

Area Wide Optimization Award Publication for the Press.

In a testament to its commitment to excellence in water management, the Brookville Municipal Authority has been bestowed with the prestigious Area Wide Optimization Award. This award, given to only nine systems, stands as a testament to the Authority's dedication to providing safe, clean, and efficient water services to its community.

The Area Wide Optimization Award, administered by the Environmental Protection Agency (EPA), and presented by the Pennsylvania Department of Environmental Protection, is a coveted recognition within the water industry. It honors utilities that demonstrate outstanding performance in effectively optimizing their water treatment processes and operations to deliver the highest quality water to consumers.

Brookville Municipal Authority's achievement reflects its unwavering commitment to meeting and exceeding regulatory standards while prioritizing environmental stewardship and public health. By employing innovative strategies and technologies, the Authority has consistently maintained water quality at the highest levels, ensuring the well-being of its residents.

The rigorous selection process for the award evaluates various factors, including compliance with water quality regulations, optimization of treatment processes, proactive maintenance practices, and community outreach efforts. Brookville Municipal Authority's proactive approach to water management, coupled with its ongoing investment in infrastructure and personnel training, positioned it as a standout recipient of this esteemed award.

"Receiving the Area Wide Optimization Award is a testament to the hard work and dedication of our entire team," remarked Aaron Haines, Commissioner at Brookville Municipal Authority. "It underscores our commitment to ensuring that our communities have access to clean, safe, and reliable drinking water."

With this latest award, the Brookville Municipal Authority reaffirms its unwavering commitment to delivering exceptional water services while continuing to innovate and evolve to meet the needs of its community in the years to come.
